

# CARE ORGANISATION FOR PREVENTION FOR YOUNG PEOPLE

## WORKSHOP 6

# CONCLUSIONS WORKSHOP 6

- **Provide information through social media**, (chats, self-questionnaires, etc.)
- **Online communities for youth** supported by professionals : allow easy access to specialists
- **Parenthood preparation programme**
- Introduce “**peers experts of experience**” in every settings
- For young people in great difficulty, **access to mental health care professionals in front-line services** should be supported/facilitated to enable the best possible orientation (prevention, detection - orientation) (FLP)
- The availability of **access to relatives** and the environment must be preserved in all areas: care, free time, training, etc.
- **Kind-reflex** : Questioning and provide the replacement of the parental function when the parent(s) is/are (hospitalised/incarcerated, etc.)

# CONCLUSIONS WORKSHOP 6 PREVENTION IN TRANSITION

- For people from different cultures, provide **culturally adapted support and assistance**;
- **Route counsellor/case-management function for youth** (should play the role of a reference person; a "council for living together")
- **Concrete meetings** between the professionals of health, disability and youth protection and education and welfare sectors with specific budget
- Possibility of **extending** forced **assistance** (or even negotiated assistance?) (20 >23 ?) for complex situations with family, trusted adult or reference person - to be requested from the youth, possibly beyond the parents

# CONCLUSIONS WORKSHOP 6

- **Enable reference persons to support**, link, guide and accompany a person with a disability.
- **Provide housing** first - priority to housing and then build the care pathway with sustained, proactive and reactive support + **A way home:**
- **Plates-form for the parents**
